CONFIDENTIAL

1. Purpose

This document lists what Source Vision contains in each of its two phases, at module level. It is a scope reference — not a technical specification and not a quotation.

Phase 1 is the Acquire demo: designed screens with click-through navigation and sample data. Nothing inside a page performs a real action.

Phase 2 is the working platform, where those same screens become live, functional modules with a real database behind them.

At a glance

Phase 1 — 24 screens across three waves. Static demo, sample data, no database.

Phase 2 — 24 modules. Fully functional platform built on Laravel and Vue.

2. Phase 1 — MVP Demo

Delivered as designed HTML screens with working navigation between them. Wave 1 is the committed set for the September demo; Waves 2 and 3 follow in priority order.

#	Module / Screen	What it covers
WAVE 1 — Committed for the September demo		
1	Login & Role Switcher	Branded login screen plus a demo switch between Customer, Admin and Developer views.
2	Public Homepage	Marketing site that sells the platform — hero, feature cards, statistics and calls to action.
3	Customer Dashboard	The main customer screen: active plan, services, campaigns, leads, newsletter results, activity.
4	Services Catalogue	The eight marketing services shown as selectable cards.
5	Marketing Packages	Eight single-service monthly subscription cards.
6	Marketing Plans	The five bundled plans — Starter, Growth, Full Service, Franchise, Agency.
7	Admin Dashboard	Back-office overview with sidebar navigation, key statistics and summary tables.
8	Development / Settings Portal	Modules, integration status, system status and product roadmap.
9	White-Label Configuration	Branding settings screen — platform name, logo, colours, domain, language.
WAVE 2 — Added after the demo build, September		
10	Campaign Request Flow	Step-by-step request screen with a visible status pipeline.
11	Campaign Reporting Dashboard	Cross-channel results — email, leads, landing pages, advertising.
12	Notifications Panel	An “Action Required” list of pending items.
13	Service Landing Pages	A reusable service page template, applied to each of the eight services.
14	Upgrade Plan Page	Plan comparison and upgrade screen.
15	Scratch Game Overview	Scratch campaigns, participants, emails collected and conversion.
16	Landing Page / Lead-Gen Overview	Example landing pages with views, sign-ups and leads.
WAVE 3 — Depth screens, as time allows		
17	Newsletter Overview	Sent, draft and planned newsletters with performance figures.
18	Admin — Customers	Customer accounts list and detail view.
19	Admin — Subscriptions & Pricing	Plan and service management screens.
20	Admin — Leads & Requests	Lead list with sources, and the incoming request queue.

#	Module / Screen	What it covers
21	Admin — Campaigns & Reports	Campaign list and reporting screens.
22	Admin — User Management	Users, roles and permissions screens.
23	Content Library	Shared assets and templates.
24	Contact & My Account	Public contact page and the customer profile screen.

• Also included in Phase 1

- Design system setup — brand colours, typography and a reusable component library.
- Sample data set and content pass across every screen.
- Testing, deployment to the demo domain, and handover documentation.

3. Phase 2 — Full Platform

The production build. Each module below turns a Phase 1 screen into working functionality, backed by a real database, user accounts and integrations.

#	Module	What it covers
FOUNDATION		
1	Authentication & Accounts	Real registration, login, verification, password reset and account states.
2	Roles & Permissions	Working access control for customer, admin and staff roles.
3	Multi-Tenancy & White-Label Engine	Per-client branding, custom domains and live re-theming.
COMMERCIAL CORE		
4	Customer Management	Full account records, profiles, assigned services and history.
5	Services Catalogue Management	Admin-controlled service definitions, pricing and availability.
6	Packages & Plans Engine	Working subscriptions — subscribe, upgrade, add-ons, renewals, usage.
7	Billing & Payments	Payment gateway, recurring billing, invoices and VAT handling.
MARKETING OPERATIONS		
8	Campaign Management	Real campaign records, scheduling, assets and ownership.
9	Campaign Request Workflow	Live request submission, assignment, approvals and notifications.
10	Email & Newsletter Engine	Lists, templates, composer, scheduling, sending and tracking.
11	Contacts & Subscribers	Subscriber management, imports, consent and unsubscribes.
12	Scratch Game Engine	A playable scratch mechanic with prizes, entries and lead capture.
13	Landing Page Builder	Publishable landing pages with forms and lead capture.
14	Leads Management	Lead records, sources, qualification and export.
INSIGHT & CONTENT		
15	Reporting & Analytics	Live reporting across all channels, plus exportable branded reports.
16	Content Library	Real asset storage, folders and reuse across campaigns.
17	Notifications & Email Dispatcher	In-app alerts and transactional email templates.
18	Admin Back-Office	Fully working versions of every admin module, plus audit logging.
PLATFORM & GROWTH		
19	Integrations Layer	Advertising, analytics, CRM, print and payment integrations, plus API.
20	AI Campaign Assistant	Campaign suggestions, content help and upsell recommendations.
21	Compliance & GDPR	Consent, data export and deletion, retention and EU data handling.

#	Module	What it covers
22	Infrastructure & DevOps	Environments, deployment pipeline, queues, backups and monitoring.
23	Data Migration from GRS	Moving existing GRS lists, templates and client data into Source Vision.
24	Print Portal	The “coming soon” service built as a working module.

4. Notes

Please note

Phase 1 module list is confirmed and follows the agreed wave plan.

Phase 2 module list is NexusLink's proposed structure and is not yet approved. Several modules — email engine, scratch game, landing page builder, reporting and integrations — are substantial builds in their own right.

Effort and cost for Phase 2 will be estimated per module once the list is agreed.

Next step

Confirm the Phase 1 wave order, then review and approve the Phase 2 module list so a module-level estimate can be prepared.

Warm regards,

Vijay Dabhi
